Irish Health Bill.

The Registror-General for Ireland reports that the number of deaths registered during the week ended 10th instance in the nineteen chief urban areas was equivalent to an annual rate of 18.6 per 1,000 of the aggregate population. In Dublin city area the rate was 18.2; in Belfest, 18.9, Cork, 23.1; Limerick, 25.7, and Waterford, 17.1. An analyse of the figures suppolied shows that of 417 deaths registered in the nineteen areas no fewer than 42 were due to pulmonary tuberculosis and 15 to other forms of the same disease. In other words, very close upon one-soventh of all the deaths were due to tuberculosis and the range of the server and annual state of the server than 42 were due to tuberculosis and 15 to other forms of the same disease. In other words, very close upon one-soventh of all the deaths were due to tuberculosis and an area of the server and annual state of the server and annual state of the server than 42 were due to the server of the ser all the deaths were due to tuberculosis Industrial Alliance," might be looked Francis Finnerty, Athenry, was fired into, on the isle of the same name at the This is a fact that should not be lost upon as highly probable in January. The following is the forecast for to-day:- sight of by the Public Health Author- That fear is now at an end, and the ... 1 0 0 Moderate or fresh south-westerly winds, it es. Basing an estimate on popular result will be that the great business tion, tuberculosis would appear to be contracts which had been hung up will about equally fatal in Belfast and the now be undertaken.
